DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to a method of fabricating a rotor cup, classified in class 29, subclass 596.
 - II. Claims 5-16, drawn to an electric motor and a rotor cup assembly, classified in class 310, subclass 89.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

In the instant case, invention II can also be made, for example, by injection molding the rotor cup instead of stamping or machining.
